Appointment Assistant

Visa-appointment software for study-visa consultancies

Nov 5, 2026 · Prepared by @shoaib

What it is

Appointment Assistant is a desktop app that does the slow part of visa appointments for you. It stores all your students' details and fills the official appointment forms automatically — in seconds, not minutes, and with no typing mistakes.

What it does for you — automatically

- Keeps every student's details in one place — name, passport, date of birth, contact, documents.
- Fills the official appointment form in one click — the student's details drop straight into the fields.
- Checks each student is ready before booking — passport, photo, documents, fee.
- Reminds you of appointments that are overdue or due within 7 days.
- Gives a clean booking data-sheet for each student, with one-tap copy buttons.
- Tracks every appointment's date, location, status and reference number.

You stay in control

You confirm the final booking yourself — one quick click. That keeps your account fully safe and your bookings never get blocked, while the app does all the work leading up to it.

Why it's worth it

- Saves hours every day — no more typing the same details for each student.
- Fewer costly mistakes — the right details, every time. One wrong entry can lose a client.
- Safe and within VFS rules — no bans, no blocked accounts.
- Your own private login — only your team can use it.
- Your data stays on your own computer — nothing is shared anywhere.

How to get started

- **Desktop app:** we send you one file (AppointmentAssistant.exe). Double-click to open — no installation needed.
- **Your login:** we create your private account; you just sign in.
- **Online version:** a web link is available on request, for use on any computer.
- **14-day free trial:** full features, free. See it work with your own students first.

Start your 14-day free trial today — reply to us and we'll send your login and the app.
